AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

Claims 1-65. (Cancelled).

66. (Previously presented) A full-color electrophoretic display element comprising:

a first capsule comprising a plurality of white particles and a plurality of red particles;

a second capsule comprising a plurality of white particles and a plurality of green particles; and

a third capsule comprising a plurality of white particles and a plurality of blue particles;

wherein the element presents a visual display in response to the application of an electrical signal to at least one of the first capsule, the second capsule, and the third capsule; and

wherein a white visual display is provided by at least the plurality of white particles in at least one of the first, second, and third capsules.

67. (Previously presented) A full-color electrophoretic display element comprising:

a first capsule comprising a plurality of white particles and a plurality of cyan particles;

a second capsule comprising a plurality of white particles and a plurality of magenta particles; and

a third capsule comprising a plurality of white particles and a plurality of yellow particles;

wherein the element presents a visual display in response to the application of an electrical signal to at least one of the first capsule, the second capsule, and the third capsule; and

wherein a white visual display is provided by at least the plurality of white particles in at least one of the first, second, and third capsules.

Claims 68-107. (Cancelled).

108. (Previously presented) The display element of claim 66 wherein the capsule further includes a suspending fluid.

109. (Previously presented) The display element of claim 108 wherein the suspending fluid is substantially clear.

110. (Previously presented) The display element of claim 108 wherein the suspending fluid is dyed.

Claims 111-113. (Cancelled).

114. (Previously presented) The display element of claim 66 further comprising a plurality of electrodes, wherein at least one of the first, second, and third capsules is addressed by a plurality of electrodes.

115. (Previously presented) The display apparatus of claim 114 wherein at least one of the plurality of electrodes has a size different from another of the plurality of electrodes.

116. (Previously presented) The display apparatus of claim 114 wherein at least one of the plurality of electrodes has a color different from another of the plurality of electrodes.

117. (Previously presented) The display element of claim 67 wherein the capsule further includes a suspending fluid.

118. (Previously presented) The display element of claim 117 wherein the suspending fluid is substantially clear.

119. (Previously presented) The display element of claim 117 wherein the suspending fluid is dyed.

Claims 120-122. (Cancelled).

123. (Previously presented) The display element of claim 67 further comprising a plurality of electrodes, wherein at least one of the first, second, and third capsules is addressed by a plurality of electrodes.

124. (Previously presented) The display apparatus of claim 123 wherein at least one of the plurality of electrodes has a size different from another of the plurality of electrodes.

125. (Previously presented) The display apparatus of claim 123 wherein at least one of the plurality of electrodes has a color different from another of the plurality of electrodes.
